PD AeroSpace, LTD.

A Total of \$6.8 million Raised during Round of Series A Funding

PD AeroSpace, LTD. (Headquarters: Nagoya City, Aichi prefecture, CEO:Shuji Ogawa, hereinafter referred to as “the company”), hereby announces capital expansion of \$928 thousand (¥100 million, \$1 =¥107) through third-party allotment of shares to two companies; Sojitz Corporation and OKB Capital Co., Ltd.. We have successfully raised a total of \$6.8 million (¥740 million) during round of series A funding.

We aim to further enhance the organization for the development of the fully reusable unmanned suborbital spaceplane with the capability of reaching 100km and returning/landing to the earth.

《Primary uses of funds》

- Enhancing the organization for the development
- Development of a new type of engine (jet-rocket combustion mode switchable engine)
- Development and flight tests of two types of experimental unmanned planes; PDAS-X06 and PDAS-X07
 - * PDAS-X06: Total length 4.9m, gross weight 400kg, high speed demonstration experimental UAV
 - * PDAS-X07: Total length 11.4m, gross weight 3.1t, unmanned suborbital plane with the capability of reaching 100km

PDAS-X06
